Question 1   0.15 / 0.15 pts

Given N, the number of tasks that are either waiting in the queue or being processed by the CPU, arrival rate Y, and response time R, what is the relationship between N, Y, R in a stable system?

- ○ N=Y/R

- ○ N=Y+R

- ○ N=YR^2

Correct!   ◉ N=YR

Question 2   0.15 / 0.15 pts

Given 60% utilization, the ratio of response time R and execution time S is:

Correct!   ◉ 2.5

○ 1.25

○ 1.67

○ 1.33

Question 3   1 / 1 pts

Given three tasks A, B, C with service time of 6ms, 4ms, and 4ms, respectively. Assume that all three tasks arrive all at the same time but A comes slightly before B and B comes slightly before C. Please show the detailed schedule for the following algorithms. Then, calculate the average response time for the following:

- FIFO: the order of scheduling is A - B

  - C with response time of 6 ms,

  10 ms, and 14 ms, respectively.

- SJF: the order of scheduling is B - C -

  A with response time of 4 ms,

  8 ms, and 14 ms, respectively.

- Round robin with time slice of 4ms: the response time of A, B, C are

  14 ms, 8 ms, and 12 ms, respectively.

- LIFO: the order of scheduling is C - B

  - A with response time of 4 ms,

  8 ms, and 14 ms, respectively.

- Round robin with time slice of 1ms: the response time of A, B, C are

| 14 | ms, | 11 | ms, and | 12 |

ms, respectively.

Answer 1:

Correct!   A

Answer 2:

Correct!   B

Answer 3:

Correct!   C

Answer 4:

Correct!   6

Answer 5:

Correct!   10

Answer 6:

Correct!   14

Answer 7:

Correct!   B

Answer 8:

Correct!   C

Answer 9:

Correct!   A

Answer 10:

Correct!   4

Answer 11:

Correct!   8

Answer 12:

Correct!   14

Answer 13:

Correct!   14

Answer 14:

Correct!   8

Answer 15:

Correct!   12

Answer 16:

Correct!   C

Answer 17:

Correct!   B

Answer 18:

Correct!   A

Answer 19:

Correct!   4

Answer 20:

Correct!   8

Answer 21:

Correct!   14

Answer 22:

Correct!   14

Answer 23:

Correct!   11

Answer 24:

Correct!   12

Question 4
0.15 / 0.15 pts

Which memory address translation strategy is used as the lowest level of all multi-level address translation systems?

○ static base+bound

Correct!

◉ paging

○ segmentation

○ swapping

Question 5
0 / 0.15 pts

Which of the following strategy causes internal fragmentation?

orrect Answer

○ paging

○ caching

'ou Answered

◉ segmentation

○ memory bitmap

Quiz Score: **1.45** out of 1.6
